

# Nanoforum – Meeting about the 2009 project

Wednesday 4<sup>th</sup> february at 2.15 pm

Unione Industriale, Centro Congressi "Agorà", via Fanti 17, Torino

**nanoforum** is the expo-conference that aims to put in touch Research and Business, to transfer the knowledge of nanotechnology and allow, in particular to Small and Medium Enterprises, a concrete product and process innovation.

This meeting about the presentation of the guidelines for 2009 edition ( the fifth one, that will take place at the Centro Congressi Torino Incontra, from the 9th to the 11th of June, hosted by the Turin Chamber of Commerce) wants to update the Participants about the main themes that will be discussed and, above all, to collect further ideas, suggestions, collaborations and...first subscriptions.

The choice to celebrate the event in Turin is an occasion to show how nanotechnologies can contribute to a concrete product and process innovation, in a region where there is a strong and established industrial reality.

Research Centres, Companies and Media of the sector are invited to participate.

## Agenda:

2.15	Participants' registration	
2.20	Welcome	Mauro Zangola, director Ufficio Studi Economici, Unione Industriale
2.30	nanoforum: from 2005 to 2009	Domenico Piazza, senior partner, ITER
